

# MT6 Section 1 Search and Secure Procedure

- 1) Operators verify that M05/MT6 cross gate is locked and reset S&S #1
- 2) A proceeds to a point near the MS4 gate where the area upstream and to the east can be observed.
- 3) B searches east side of enclosure and hut.
- 4) B closes the door to the Counting Room and resets S&S #2.
- 5) B continues searching the area on either of Experiments's apparatus and MT6BS1, then rejoins A.
- 6) Operators exit the enclosure and reset S&S #3.
